INDEX OF VOLUME XVII

Akasaki, Takeo. *Immersions of metric spaces into Euclidean spaces*, 1015
Albert, A. A. *A normal form for Riemann matrices*, 1025
Alvarez, Laurence R. *Undirected graphs realizable as graphs of modular lattices*, 923
Anderson, F. W. *Lattice-ordered rings of quotients*, 434
Anderson, T., Divinsky, N., and Suliński, A. *Hereditary radicals in associative and alternative rings*, 594
Anvari, Morteza. *Derivative of singular set-functions*, 13
Appling, William D. L. *Refinement-unbounded interval functions and absolute continuity*, 257

Baker, A. *On some diophantine inequalities involving the exponential function*, 616
Bantegnie, Robert. *Sur l'indice de certains réseaux de R^4 permis pour un octaèdre*, 725
Barnes, Wilfred E. and Cunnea, William M. *Ideal decompositions in Noetherian rings*, 178
Beineke, Lowell W. and Harary, Frank. *The genus of the n-cube*, 494
——— *The thickness of the complete graph*, 850
Bercov, Ronald D. *The double transitivity of a class of permutation groups*, 480
Bernstein, Leon. *A periodic Jacobi-Perron algorithm*, 933
Brauer, Fred. *Some refinements of Lyapunov's second method*, 811
Browder, Felix E. *On a theorem of Beurling and Livingston*, 367
Brown, Arlen, Halmos, P. R., and Pearcy, Carl. *Commutators of operators on Hilbert space*, 695
Brown, William G. *Enumeration of quadrangular dissections of the disk*, 302
Bullen, P. S. *A general Perron integral*, 17
Butts, H. S. and Phillips, R. C. *Almost multiplication rings*, 267

Caldwell, W. V. *Some relationships between Bers and Beltrami systems and linear elliptic systems of partial differential equations*, 627
Carlitz, L. *The distribution of irreducible polynomials in several indeterminates II*, 261
Carroll, R. W. and Wang, C. L. *On the degenerate Cauchy problem*, 245
Castonguay, C. E. and Helfenstein, H. G. *A distortion theorem for analytic maps of annuli*, 185
Chakerian, G. D. and Stein, S. K. *On measures of symmetry of convex bodies*, 497
Chartrand, Gary. *See* Kay and Chartrand
Chehata, C. G. *On commutative continuation of partial endomorphisms of groups*, 429
Clunie, J. *On integral functions having prescribed asymptotic growth*, 396
Coddington, Earl A. *Formally normal operators having no normal extensions*, 1030
Cohen, Henry B. *The k-normal completion of function lattices*, 669
Cohn, James A. and Livingstone, Donald. *On the structure of group algebras, I*, 583
Cunnea, William M. *See* Barnes and Cunnea
Cunningham, F., Jr. and Schoenberg, I. J. *On the Kakeya constant*, 946

Divinsky, N. *See* Anderson, Divinsky, and Suliński
Divinsky, N. and Suliński, A. *Kurosh radicals of rings with operators*, 278
Dulmage, A. L. and Mendelsohn, N. S. *The structure of powers of non-negative matrices*, 318

Edmonds, Jack. *Paths, trees, and flowers*, 449
Edrei, Albert and Fuchs, Wolfgang H. J. *Entire and meromorphic functions with asymptotically prescribed characteristic*, 383
Edwards, R. E. *Bipositive and isometric isomorphisms of some convolution algebras*, 839
Eggleston, H. G. and Zirakzadeh, A. *A property of two chords which divide a convex curve into four arcs of equal length*, 63
Erdös, P. and Pósa, L. *On independent circuits contained in a graph*, 347
Erdös, Paul and Sharma, A. *On Tchebycheff quadrature*, 652
Ernest, John. *A new group algebra for locally compact groups II*, 604

Feller, E. H. and Swokowski, E. W. *Prime modules*, 1041
Foulis, D. J. *Semigroups co-ordinatizing orthomodular geometries*, 40
Fuchs, Wolfgang H. J. *See* Edrei and Fuchs
Fulkerson, D. R. *Upsets in round robin tournaments*, 957
Fulkerson, D. R., Hoffman, A. J., and McAndrew, N. H. *Some properties of graphs with multiple edges*, 166

Gallagher, P. X. *The generation of the lower central series*, 405
Gilbert, R. P. *On the location of singularities of a class of elliptic partial differential equations in four variables*, 676
Gilmer, Robert W., Jr. *The cancellation law for ideals in a commutative ring*, 281
Gioia, A. A. *The K-product of arithmetic functions*, 970
Gordon, B. and Robertson, M. M. *Two theorems on mosaics*, 1010
Gorenstein, Daniel. *Finite groups in which Sylow 2-subgroups are abelian and centralizers of involutions are solvable*, 860

Hajnal, A. *A theorem on k-saturated graphs*, 720
Halmos, P. R. *See* Brown, Halmos, and Pearcy
Halperin, Israel. *Regular rank rings*, 709
Harary, Frank. *See* Beineke and Harary
Harrison, Michael A. *A census of finite automata*, 100
Hasumi, Morisuke and Srinivasan, T. P. *Invariant subspaces of continuous functions*, 643
Hayes, Charles A., Jr. *Fubini theorem for a certain type of integral*, 142
Helfenstein, H. G. *See* Castonguay and Helfenstein
——— *Topological H-surfaces*, 847
Hilt, Arthur L. and Hsiung, Chuan-Chih. *Vector fields and infinitesimal transformations on almost Hermitian manifolds with boundary*, 213
Hoffman, A. J. *See* Fulkerson, Hoffman, and McAndrew
Hoffman, A. J. and Ray-Chaudhuri, D. K. *On the line graph of a finite affine plane*, 687
Hsiung, Chuan-Chih. *See* Hilt and Hsiung

Johnsen, E. C. *Matrix rational completions satisfying generalized incidence equations*, 1
Jónsson, W. *(C, γ, μ)-homogeneity of projective planes and polarities*, 331

Kakita, Takao. *Hyperbolic convolution operators*, 559
Kay, David C. and Chartrand, Gary. *A characterization of certain ptolemaic graphs*, 342
Kerr-Lawson, A. *A filter description of the homomorphisms of H^**, 734
Killgrove, Raymond B. *Completions of quadrangles in projective planes II*, 155
Kimura, Naoki, Tamura, Takayuki, and Merkel, Rudolph. *Semigroups in which all subsemigroups are left ideals*, 52
Kotzig, Anton. *Colouring of trivalent polyhedra*, 659
Kuyk, Willem. *The construction of fields with infinite cyclic automorphism group*, 665

Livingstone, Donald. *See* Cohn and Livingstone
Lorimer, P. J. *T_2-groups and a characterization of the finite groups of Moebius transformations*, 353

McAndrew, M. H. *See* Fulkerson, Hoffman, and McAndrew
McArthur, Charles W. and Retherford, James R. *Uniform and equicontinuous Schauder bases of subspaces*, 207
McFarland, Robert and Mann, H. B. *On multipliers of difference sets*, 541
Mann, H. B. *See* McFarland and Mann
Maranda, J.-M. *Formal categories*, 758
Meir, A. *Tauberian estimates concerning the regular Hausdorff and $[J, f(x)]$ transformations*, 288
Mendelsohn, N. S. *See* Dulmage and Mendelsohn
——— *Correction to: An algorithmic solution for a word problem in group theory*, 505
Merkel, Rudolph. *See* Kimura, Tamura, and Merkel
Morris, A. O. *The spin representation of the symmetric group*, 543
Motzkin, T. S. and Straus, E. G. *Maxima for graphs and a new proof of a theorem of Turán*, 533
Mullin, R. C. *On counting rooted triangular maps*, 373
Murdoch, B. H. *A note on well-distributed sequences*, 808

Netanyahu, E. *Extremal problems for Schlicht functions in the exterior of the unit circle*, 335

O'Neill, Barrett. *Isotropic and Kähler immersions*, 907
Osborn, J. Marshall. *Identities of non-associative algebras*, 78
Ostrom, T. G. *A characterization of the Hughes planes*, 916
Outcalt, D. L. *An extension of the class of alternative rings*, 130

Pearcy, Carl. *See* Brown, Halmos, and Pearcy
Peleg, Bezalel. *The kernel of m-quota games*, 239
Phillips, R. C. *See* Butts and Phillips
Pósa, L. *See* Erdös and Pósa

Ramanujacharyulu, C. *Trees and tree-equivalent graphs*, 731
Ray-Chaudhuri, D. K. *Some configurations in finite projective spaces and partially balanced incomplete block designs*, 114
——— *See* Hoffman and Ray-Chaudhuri
Retherford, James R. *See* McArthur and Retherford
Rigby, J. F. *Affine subplanes of finite projective planes*, 977
Robertson, M. M. *See* Gordon and Robertson
Robinson, D. W. *On matrix commutators of higher order*, 527
Rothschild, Bruce. *The decomposition of graphs into a finite number of paths*, 468

Sagle, Arthur A. *On anti-commutative algebras and analytic loops*, 550
Schoenberg, I. J. *See* Cunningham and Schoenberg
Sharma, A. *See* Erdös and Sharma
Smith, Gaston. *On the (f, d_n)-method of summability*, 506
Srinivasan, T. P. *See* Hasumi and Srinivasan
Stein, S. K. *See* Chakerian and Stein
Straus, E. G. *See* Motzkin and Straus
Suliński, A. *See* Divinsky and Suliński
——— *See* Anderson, Divinsky, and Suliński
Swanson, C. A. *Domain perturbations of the biharmonic operator*, 1053
Swokowski, E. W. *See* Feller and Swokowski

Tamura, Takayuki. *See* Kimura, Tamura, and Merkel
Taylor, John C. *A class of translation lattices*, 31
Thierrin, G. *Anneaux métaprimitifs*, 199
Topping, David M. *Some homological pathology in vector lattices*, 411
Toth, L. Fejes. *On the total area of the faces of a four-dimensional polytope*, 93

Unni, K. R. *On generalized powers of the difference operator*, 124

Walkup, David W. *Minimal interchanges of (0, 1)-matrices and disjoint circuits in a graph*, 831
Wang, C. L. *See* Carroll and Wang
Webb, W. A. *Sums of rational numbers*, 1019
Wicke, H. H. *See* Worrell and Wicke
Worrell, J. M., Jr. and Wicke, H. H. *Characterizations of developable topological spaces*, 820

Zaidman, S. *Convexity properties for weak solutions of some differential equations in Hilbert spaces*, 802
Zirakzadeh, A. *See* Eggleston and Zirakzadeh
